

# Introduction to Python in Environmental Sciences 2018

-  The 3-day workshop will give a hands-on introduction to Python — modern open-source programming language with large community support.
-  It will start with basics of Python scripting.
-  The next 2 days will focus on the analysis and visualisation of data formats commonly used in environmental sciences.
-  **No previous Python experience is required!**
-  More info: <https://ueapy.github.io/pythoncourse2018>

## Schedule

Wed	10 Jan	09:00–17:00	Python basics and programming environment
Thu	11 Jan	09:00–17:00	Scientific data manipulation and plotting
